DATE OF INFORMATION []

THIS IS UNEVALUATED INFORMATION

2. Only first echelon maintenance on vehicles and major weapons was done at the 62nd Inf. Regt. Spare parts were available in supply, but the parts mostly used were cannibalized. Combat serviceability of vehicles and major weapons was fair to good. 25X1
3. In the field, steel drums of 250 lit. capacity were used to store gasoline. The 18th Inf. Div. had two [] gasoline trucks with permanently-fixed metal tanks. The gasoline capacity of these trucks was approximately 1,500 to 2,000 lit. The German "jerry" cans (20 lit.) were also used to transport gasoline. Nozzles were available, but limited in quantity. Funnels were used in most cases. Each vehicle carried three spare jerry cans of gasoline. I have no further details. 25X1
